

Blockchain powered Supply Chain Traceability, Anti-Counterfeiting and Compliance Management

www.scalion.com

Introduction

Scalion Agritech SaaS platform facilitates **Trade** by connecting **Supply** (Farms, Processors, Traders) and **Demand** (Import-Export, Buyers) side of Agri-food ecosystem while ensuring **Trust, Transparency, and Traceability** using advanced technologies like **AI, Blockchain, Satellite Imagery, IoT, RFID, NFC etc.**

-  Cloud-Based Agritech Platform
-  End-to-End Digital Solutions
-  AI Driven Intelligence

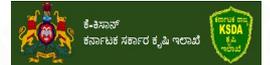

Founded Year

2023

Trusted by

100+ Agri-Businesses

Recognised & Validated by

Challenges

Counterfeit Agri Products have ~ **30% market share**. Agri businesses, farmers incur loss. (ASPA - CRISIL).

Agri Food Supply chains are broken, making it **difficult to verify Product Origin**.

Dynamic compliance requirements and stringent guidelines that act as **Technical Barriers to Trade (TBTs) for global market access**.

Export rejections, cancellation of licenses and certifications, loss of revenue due to lack of SOPs and documentation.

How Scalion helps?

Trace

- Blockchain-powered Unit Level Agri-food Supply Chain Traceability
- Comprehensive Supply Chain Tracker from farm to end consumers.

Protect

- Brand Protection, Product Authentication
- AI powered digital product passport. Secure and non-clonable.

Comply

- Technical Barriers to Trade, Regulatory Compliances Management
- Certification, Audit Agency SOPs, Documentation

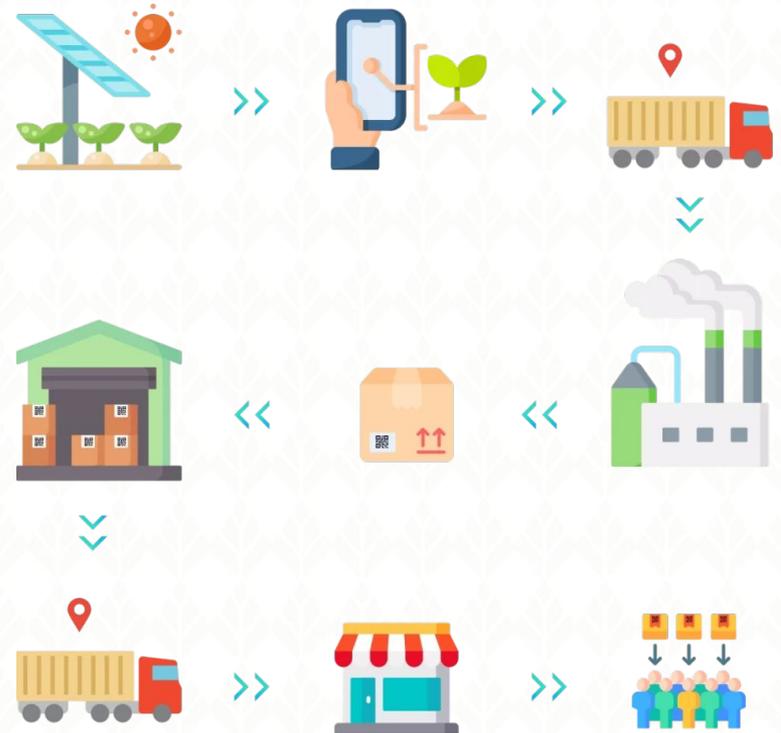

Trade

- Connect Global trade compliant agri-food suppliers and buyers
- Market linkage for agri commodities on a secure, decentralized marketplace.

Trace

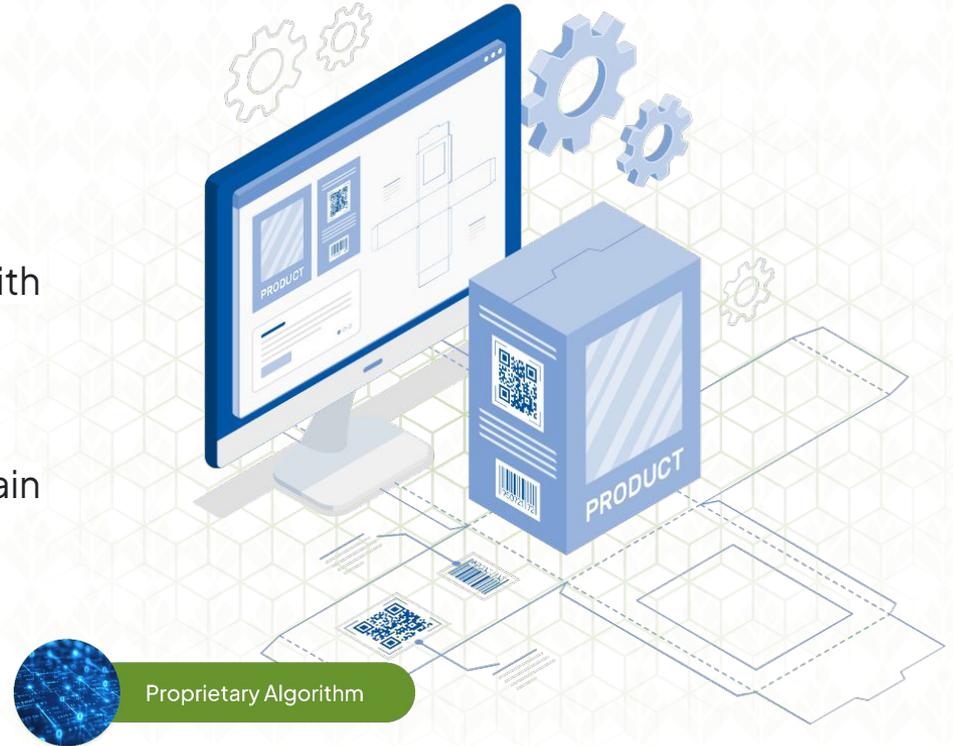

Scalion Trace is an advanced blockchain traceability platform that provides **complete visibility into the agricultural supply chain**. It enables real-time tracking, ensures product authenticity & prevents fraud.

Powered by blockchain, Scalion Trace delivers tamper-proof traceability across the entire agricultural ecosystem—covering food products and agri-inputs like seeds, fertilizers and crop protection materials.

Protect

Scalion's Protect Platform is designed to **safeguard your brand and products against counterfeiting and unauthorized access**. With advanced traceability, real-time monitoring, and secure QR code solutions, it ensures product authenticity, strengthens supply chain transparency, and builds customer trust.

Digital Signature

Blockchain Technology

Proprietary Algorithm

Computer Vision

Holographic Security

Scalion Compliance Platform allows businesses to **identify compliance gaps and mitigate risks proactively**. With Scalion, companies can ensure compliance, drive operational excellence, and maintain a competitive edge in the global market. Its intelligent insights empower businesses to make data-driven decisions for long-term growth and sustainability.

Trade

Scalion Trade is a SaaS platform connecting verified agri-food suppliers with buyers globally. It ensures quality, traceability and compliance from farm to consumer, enabling suppliers to manage products and orders, while buyers access trusted sources. With tools for logistics, payments, and analytics, the platform helps businesses trade efficiently and build lasting partnerships.
